Tran Doan Xuan Thang

Backend Software Engineer

Ho Chi Minh City, Vietnam | 0367 854 658 | thangtran.it.work@gmail.com

github.com/thangtranitwork | linkedin.com/in/thangtran | portfolio-site

Professional Summary

Backend Software Engineer with hands-on experience designing and scaling distributed systems, enterprise microservices, and high-performance internal platforms. Proficient in **Go (Golang)**, **PostgreSQL/MySQL**, **gRPC**, **Redis**, and **RabbitMQ**, with a strong focus on high-concurrency processing, database optimization (indexing, query tuning, eliminating N+1 queries), and reliable architecture patterns.

Technical Skills

Languages: Go (Golang), Java, JavaScript/TypeScript, SQL, Python

Backend & Architecture: Microservices, gRPC, Protocol Buffers, RESTful APIs, WebSocket, Transactional Outbox, Event-Driven

Databases & Messaging: PostgreSQL, MySQL, Redis (Distributed Locking, Caching), MongoDB, Neo4j, RabbitMQ, Kafka

Frontend & Tools: Next.js, React.js, Tailwind CSS, Docker, Nginx, Linux, Git, GitHub Actions, pprof Profiler

Work Experience

Fclick Solutions Co., Ltd Mar 2026 – Present

Backend Software Engineer *Ho Chi Minh City, Vietnam*

- **Smart Matching & Map Cost Saving:** Built multi-service ride booking and preferred-destination matching so drivers receive trips on their way home while reducing third-party map costs.
- **Partner Booking & Live Tracking:** Enabled external partners and businesses to book rides and deliveries directly from their platforms with live tracking links and automatic driver reassignment.
- **In-App Calling & Automated Alerts:** Added direct in-app voice calls and multi-channel order updates across **Zalo**, **SMS**, **Email**, and mobile push notifications.
- **ERP & Large-Scale Batch Operations:** Built internal ERP modules for fleet inventory and contract approvals alongside bulk data import and automated fee-collection tools to reduce manual operational overhead.
- **High-Speed CRM & Lead Pipeline:** Centralized multi-channel leads with regional access control and optimized customer search and sales analytics latency from **2.5s down to 40ms**.

Key Projects

Social Network Microservices | *github.com/thangtranitwork/social-network-micro-services-go* Jul 2025 – Present

- **Tech Stack:** Go (Golang), gRPC, Protobuf, PostgreSQL, Neo4j, Redis, MongoDB, Kafka, MinIO, Next.js, Docker, CI/CD
- Architected a scalable microservices platform adopting the **Database-per-Service** pattern with an **API Gateway** handling centralized JWT auth, rate limiting, and reverse proxy routing.
- Built graph-based recommendation engines using **Neo4j** for personalized newsfeed ranking and friend suggestions.
- Developed real-time messaging and WebRTC signaling over **WebSocket**, backed by **MinIO** for presigned media uploads and **FCM** for push notifications.
- Configured smart **GitHub Actions CI/CD** pipelines to detect modified services and automate isolated Docker deployments.

MultiWallet – Personal Finance Management | *github.com/thangtranitwork/multi-wallet-management* Aug 2026 – Present

- **Tech Stack:** React Native (Expo SDK 57), TypeScript, Expo SQLite, Gemini 2.0 Flash Vision, Neo-Brutalism UI
- Designed an **Offline-First** mobile app managing multi-source balances, credit card billing cycles, installments, and debts with multimodal AI receipt OCR.
- Implemented dynamic **NAPAS-standard VietQR** generation with automated billing amounts and recipient account fallbacks.

Education & Honors

Saigon Technology University (STU) 2021 – 2025

Bachelor of Engineering in Information Technology *GPA: 3.52 / 4.0*

- **Honors & Awards: 1st Place** (2021–2022) & **3rd Place** (2023–2024) in "Potential Coder Competition"; 4 consecutive academic years Good Study – Good Practice Awards (2021 – 2025).
